

Gannets and boobies SULIDAE– Dissections and biometrics

Species: Br Booby / Northern Gannet 0700 0710		Coll number:			Collected parts:			Collected by:													
Date:		200....			Where found:																
Sex: ♂ / ♀ / ?		Plumage: Plumage type: (1) – (2) – (3) – (4) – (5) – Adult																			
Condition corpse:		<input type="checkbox"/> <i>Very Fresh</i> – <input type="checkbox"/> <i>Fresh</i> – <input type="checkbox"/> <i>Rather Fresh</i> – <input type="checkbox"/> <i>Rather Old</i> – <input type="checkbox"/> <i>Old</i> – <input type="checkbox"/> <i>Very Old</i>																			
Oiled: yes / no / unclear		% covered, oiled parts:																			
Remarks:																					
biometrics					accuracy																
Bill length:		tip-feathers			0.1mm																
Bill depth:		base			0.1mm																
Head length:					mm			Skip if difficult, callipers may be too short													
Tarsus length:		L			R			0.5mm													
Wing length:		L			R			mm Note: >50cm long ruler may be needed													
Tail length:					mm																
Clean mass:					g																
Sternum:					mm																
					measured by:																
moult score																					
primaries L:		10	9	8	7	6	5	4	3	2	1										
primaries R:		10	9	8	7	6	5	4	3	2	1										
secondaries:		left					right														
tail:					7	6	5	4	3	2	1	1	2	3	4	5	6	7			
contour feathers:																					
breeding patch:		<input type="checkbox"/> present, <input type="checkbox"/> absent, notes:																			
remarks:																					
internal study																					
subcutaneous fat:		0	1	2	3	NOTE! Fat stores should be examined at shoulder & back															
deposited fat:		0	1	2	3	remarks:															
breast muscle:		0	1	2	3	remarks:															
guts:		0	1	2	3	colour:		remarks:													
kidneys:		0	1	2	3	colour:		remarks:													
liver:		0	1	2	3	colour:		remarks:													
lungs:		0	1	2	3	colour:		remarks:													
sex and age:																					
		♂ testis: × mm		descr.: long thin / long thick / short round //																	
		♀ oviduct: 1 2 3 4		foll. max:		mm Ø / not structured															
bursa Fabricii:		+ - ?		size: × mm		descr.: large / mod. / small															
stomach		colour gizzard:			worms: yes / no remarks:																
		colour proventr:																			
stomach contents:																					
										bl: yes / no											
Notes:
